

# Green Energy Tariff

Improve your environmental credentials  
with our REGO backed energy product.

## Renewable energy

All the energy you buy is matched by the purchase of renewable energy.

## Peace of mind

Remove uncertainty and know exactly where your energy is sourced from\*.

## In-depth analysis

We'll provide an independent, annual audit in line with the supply of REGOs and yearly Fuel Mix Disclosure, which can be used to support the environmental impact of your energy supply in non-financial reporting, including GHG Protocol Scope 2.

## Tailor-made report

A report individual to you is available on request, listing the REGOs assigned to your supply.

## What are Renewable Energy Guarantees of Origin (REGO)?

REGOs are green energy certificates, which offer assurances that all the energy you have bought comes from renewable sources. Ofgem issue one REGO certificate, to generators of renewable energy, for every megawatt hour (MWh) of eligible renewable electricity output.

## Why choose a REGO?

Adopting greener practices has become an increasing priority for businesses. This product can offer your business transparency from UK generation to supply point. You'll know exactly where your energy is sourced from and its environmental impact, ensuring you can make an informed choice about your energy supply.

## Why ScottishPower?

ScottishPower is part of the Ibedrola Group, a world leader in clean energy and the leading wind energy producer worldwide.

We are part of the first integrated UK energy company to generate 100% renewable electricity. Net zero emissions is our most important goal and we're committed to driving the change to a cleaner electric future - delivering a better future, quicker for everyone.
